I can write a diary entry to describe the boy's day on the Beach.

Dear Diary,

Today was a great day. I went to the beach. I Investigated the curious bugs on the beach, using my magnifying glass. I loved digging in the sand looking for stones and treasure. Just before I left I saw a washed up strange box in the sand.

I can describe my favourite underwater scene from the camera

My favourite scene is the mermaid town at 3:24. All the bright red squids are carrying lovely grass green mermaids. Mermaids catch a ride on sting rays to get to their coral homes. Fish swim around passing the underwater seaweed trees. Squids are acting as buses getting mermaids home. There is different coloured coral blue, purple and yellow.

I can write the inside and outside thoughts and feelings for different characters.

"What is happening" said the frog. Why am I flying? He thought. "I am so high up" He said. **YIPPEE!** He shouted. "I'm going to wave to that man!" He said, he waved "buddy's follow me!" He said. They followed him into a old Lady's house. She was sleeping. They grabbed the remote and turned the TV on with his tongue. "Let's watch FOOTBALL" "YES" They all said until it was 6 o'clock. They all started to fall down to the ground "HELP" they said "OW!" they shouted. They jumped back to the pond waiting to fly.

Ash cloud maker

Red liquid maker

Deadly-culdron

Mountains - fire

Scary - mountain

chloe

Ricrey

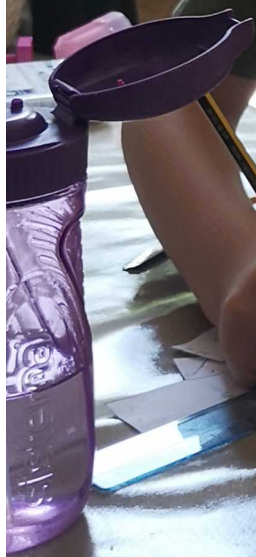

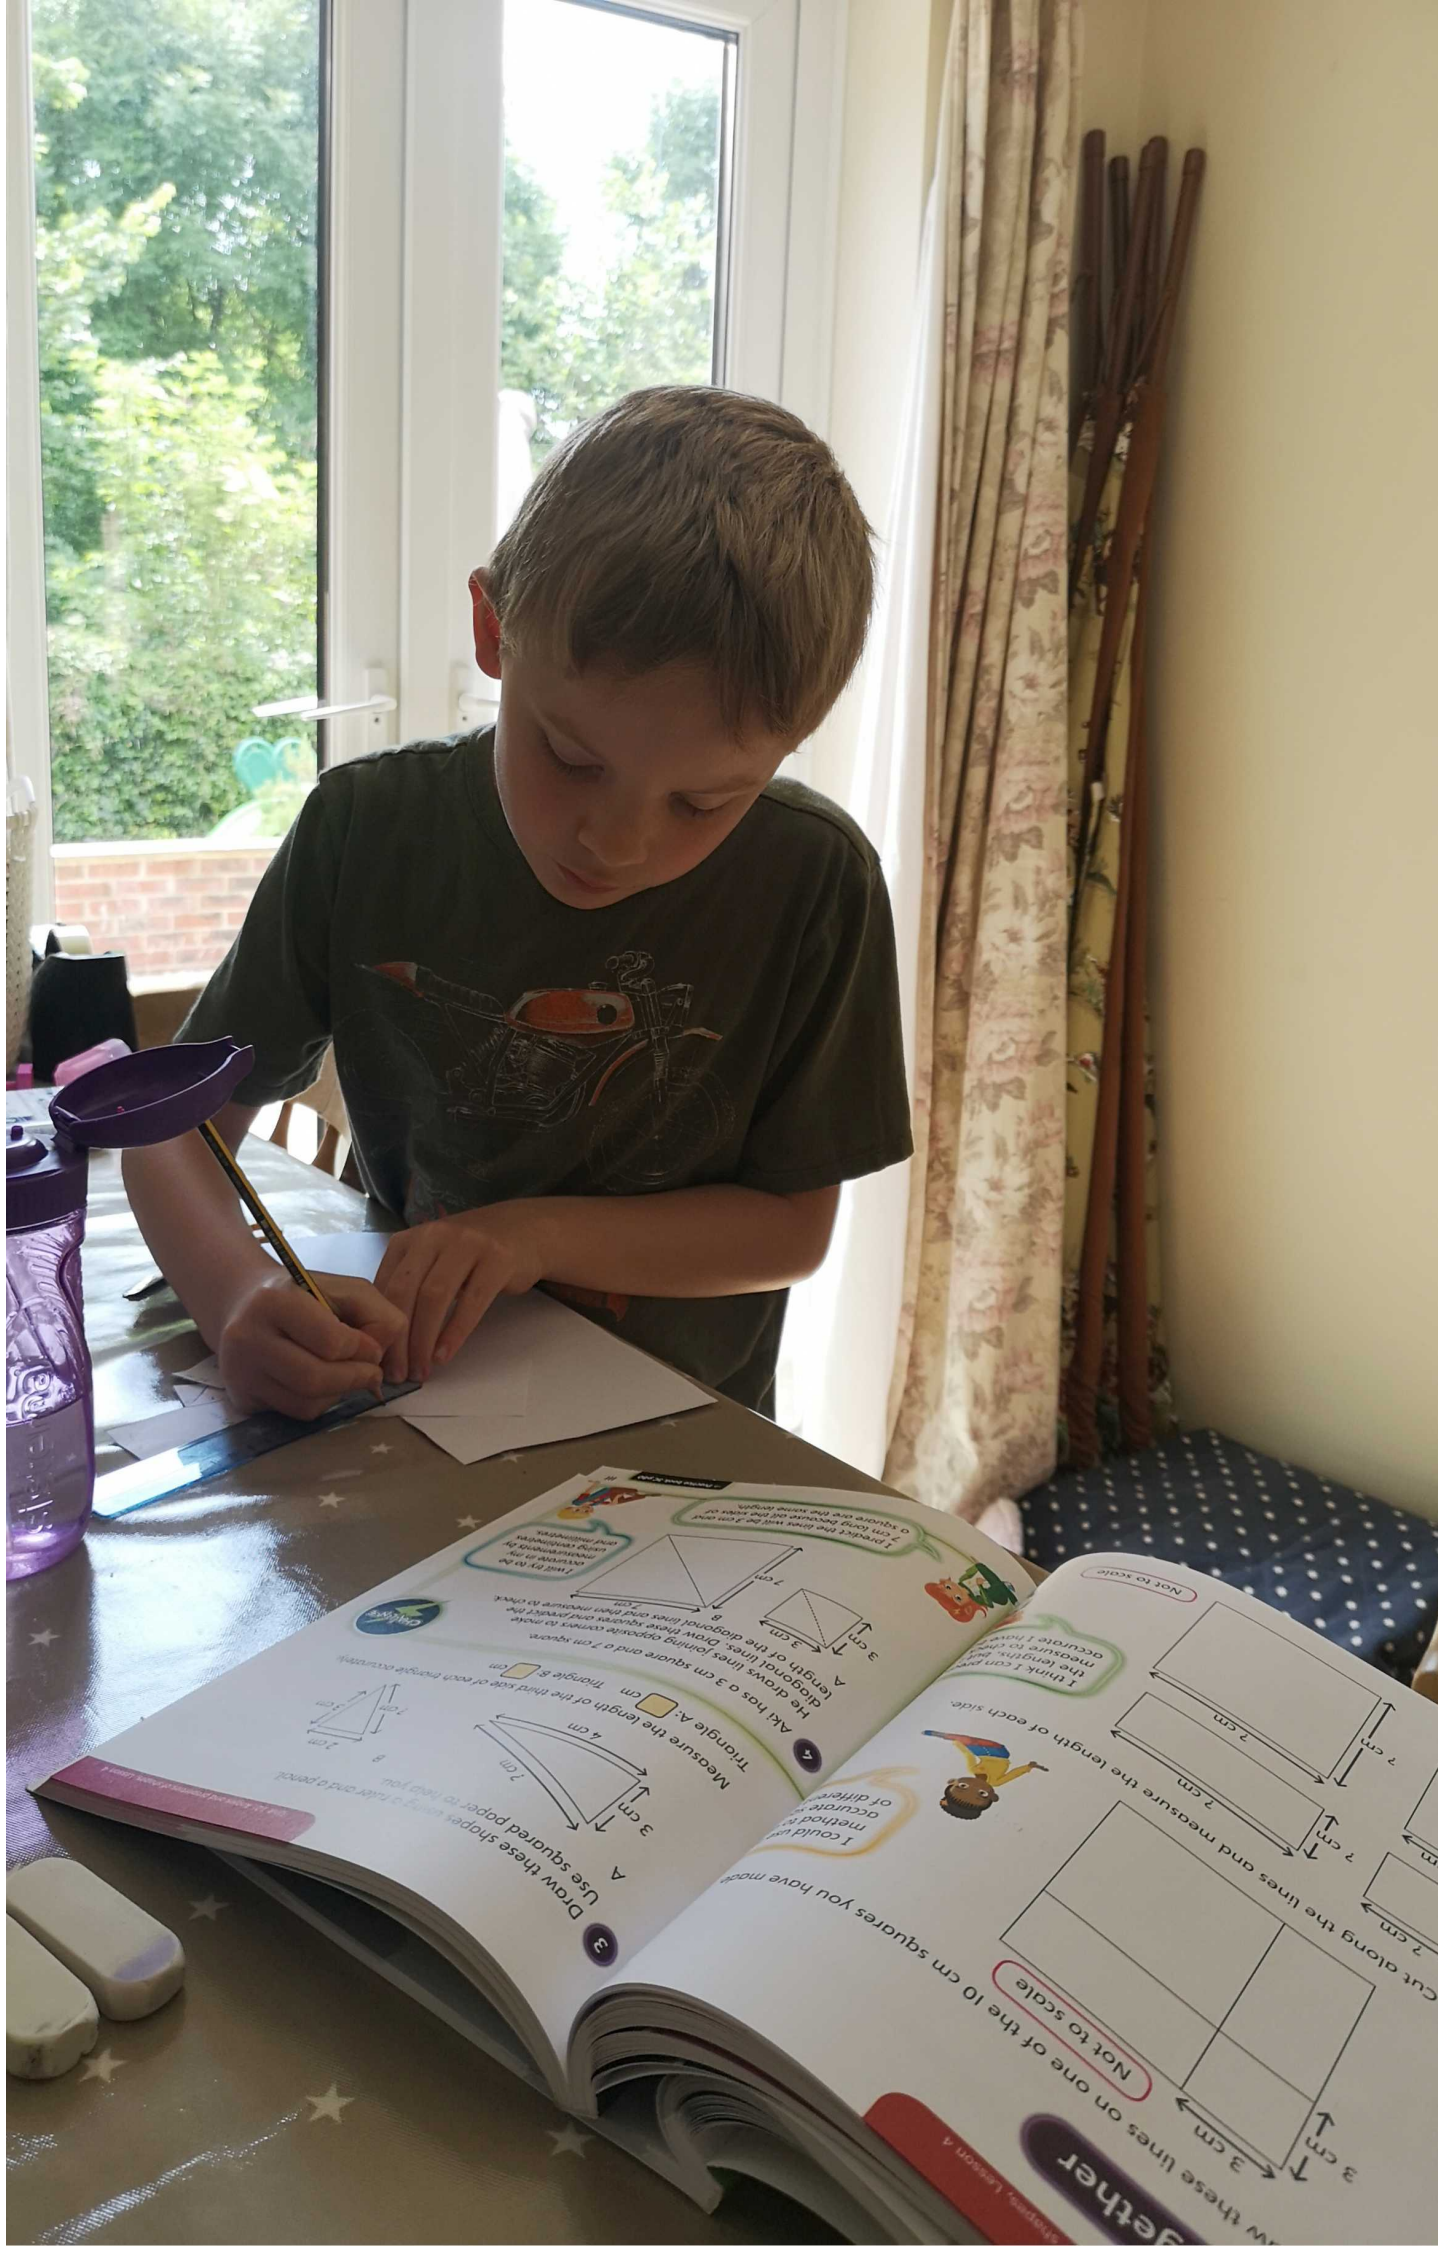

Emma

# THE MERMAIDS of MACO IRELAND

**Put these lines on one of the 10 cm squares you have made.**

**Not to scale**

Cut along the lines and measure the length of each side.

I think I can give the length of the diagonal lines. Draw three squares and then measure to make a length of the diagonal lines. Joining squares to make a 3 cm square and a 4 cm square.

Triangle A:  $\square$  cm

Triangle B:  $\square$  cm

Measure the length of the third side of each triangle accurately.

Use squared paper to help you.

3 Draw these shapes using a ruler and a pencil.

4 He has a 3 cm square and a 4 cm square. Draw three squares and then measure to make a length of the diagonal lines. Joining squares to make a 3 cm square and a 4 cm square.

5 I think I can give the length of the diagonal lines. Draw three squares and then measure to make a length of the diagonal lines. Joining squares to make a 3 cm square and a 4 cm square.

6 I think I can give the length of the diagonal lines. Draw three squares and then measure to make a length of the diagonal lines. Joining squares to make a 3 cm square and a 4 cm square.

7 I think I can give the length of the diagonal lines. Draw three squares and then measure to make a length of the diagonal lines. Joining squares to make a 3 cm square and a 4 cm square.

8 I think I can give the length of the diagonal lines. Draw three squares and then measure to make a length of the diagonal lines. Joining squares to make a 3 cm square and a 4 cm square.

9 I think I can give the length of the diagonal lines. Draw three squares and then measure to make a length of the diagonal lines. Joining squares to make a 3 cm square and a 4 cm square.

10 I think I can give the length of the diagonal lines. Draw three squares and then measure to make a length of the diagonal lines. Joining squares to make a 3 cm square and a 4 cm square.
