

HOW TO MAKE A VIKING AXE By Stella xox

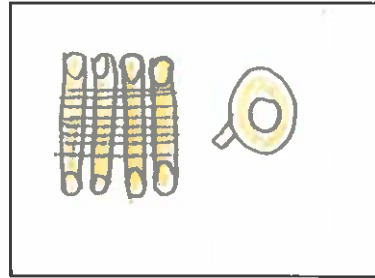

Have you ever wanted to be like a real Viking? Well there's no such thing as a Viking without an axe! Follow these easy instructions to make your very own.

You Will Need:

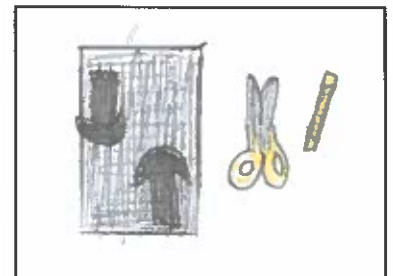

- 6-7 not single-us straws
- Wool (Black or grey)
 - Card (1-2 sheets)
- Masking/Sellotape
 - Glue
- Grey Pencil

METHOD:

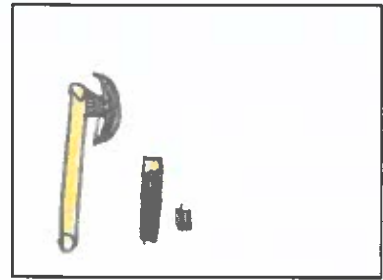

- 1) Quickly collect 6-7 straws. Bunch them together then wind some tape around the straws until they are secure.

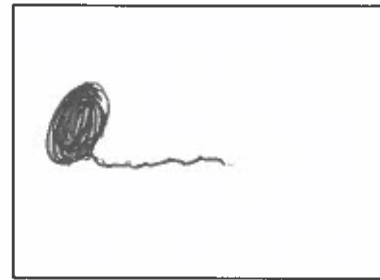

- 2) On the piece of card, lightly sketch the axe blade. It looks like a rectangle and a crescent moon together. Cut out and repeat.

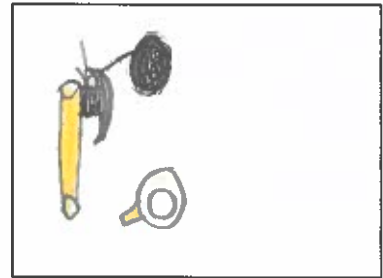

- 3) Stick the 2 axe blades together with glue then attach to the bundle of straws with tape.

- 4) Now get your wool. Cut it to quite long lengths so that you can wind it around your axe blade.

- 5) Attach one end of the wool o the Back of the axe head. Now, accurately wind it around the whole ~~axe~~ head until you get to the crescent moon. Secure it with tape.

- 6) Shade in the rest of the axe head with a grey pencil.

- 7) Congratulations! You have made your axe- Just please...don't kill anyone!
