

# Music poster on what I have learnt 9.6.2020

## Crotchets and Quavers

This is a Quaver  
They are worth half a beat.  
You can see 2  
Quavers  
and they look like this-

This is a Crotchet-  
They are worth 1  
beat.

## About Beethoven

Beethoven was born in Germany in December 1770, no one knows the exact date.

He is very famous for being one of the worlds most greatest composers of classical music.

When Beethoven was in his twenties he began to lose his hearing. Although he could still continue making music he had to try to remember what all of the orchestra instruments made in his head.

When he or someone else played an instrument he could feel the vibration that the instruments made.

## Tips for learning music

It can be very hard to learn how to play an instrument but if you never give up it will take you very far.

This is a quote that my dad tells me when I try and do something-

*'If your going to take the time you may as well put the effort in and do it right.'* - Paul Hellier

Please take this advise and enjoy!!
