

# Drinking horn

A drinking horn is a horn that the vikings drink from. They drank mead (a honey drink).

In these instructions we will be making your own drinking horn.

Supplies: card, string, tape, three straws, ruler and colouring pensils.

1. First get a piece of paper and fold the corners to the edge. Fold into a cone.

2. Cut the top off and tape it.

3. Colour the horn grey, black or brown.

4. Next get a straw and flatten it.

5. Wrap the straw around the cone.

6. Take the straw off the crane and tape.

7. Cut a straw into three bits and flatten the top of the pieces and fold to make a hook. Then rap some string round the tops of the legs.

8. Then you are finished.
